Avertissements

- Les transcriptions britanniques proviennent du Longman Pronunciation Dictionary (Wells (2008)).
- Les transcriptions américaines sont sujettes à caution. Elles sont récupérées directement du dictionnaire de Carnegie Mellon University, mais l'algorithme que j'ai écrit pour la conversion en IPA est loin d'être entièrement fonctionnel. Vérifiez-les dans votre dictionnaire de prononciation favori.
- Les erreurs non repérées, tant sur la forme que sur le fond, sont de mon fait uniquement.
- Envoyez vos questions, suggestions, corrections et autres à l'adresse suivante : adrienmeli at gmail

1.2 Échéances

Échéances	Instructions
27/09/2021	Transcrire les mots suivants : "fought, shine, jar, look, passes"
04/10/2021	Transcrivez les mots suivants. Quels sont ceux dont les voyelles ne respectent pas la règle orthographique ?
11/10/2021	Find 5 words not mentioned in class featuring historically assimilated sound (hint: yod-coalescence). Find 5 sentences likely to feature assimilations in connected speed. Mention the direction of these potential assimilations.
11/10/2021	Transcrire les listes de mots de la leçon n°3.
25/10/2021	Examen de mi-semestre (1h)
22/11/2021	Faire le travail de la leçon n°8
13/12/2021	Examen de fin de semestre (1h)

2 Lesson n°1

2.1 Administration

2.1.1 Présentation

• La phonétique (1CAE301) compte pour 20% de l'UE 301 au Semestre 1.

2.1.2 Échéances

Échéances	Instructions
27/09/2021	Transcrire les mots suivants : "fought, shine, jar, look, passes"
25/10/2021	Examen de mi-semestre (1h)
13/12/2021	Examen de fin de semestre (1h)

2.1.3 Éléments pratiques

- Centralisez vos notes.
- Les transcriptions de référence proviennent du Longman Pronunciation Dictionary (Wells (2008))
- Les transcriptions du English Pronouncing Dictionary (Jones et al. (2011)) sont aussi acceptées.
- adrienmeli.xyz

2.2 La représentation des sons

2.2.1 l'API

La représentation des sons se fait avec les symboles de l'alphabet phonétique international (API) ("the International Phonetic Alphabet, or IPA").

IPA Chart

2.2.2 Les sons de l'anglais

Les sons de l'anglais sont bien sûr moins nombreux que ceux de la liste établie dans l'API.

Ces symboles sont supposés connus...

2.2.3 Exercice

Listen to the following words and transcribe them:

3.1 La règle orthographique

Outre la détermination du schéma accentuel des mots, un autre enjeu est la détermination de la qualité des voyelles.

Nous appellerons "règle orthographique" le tableau de correspondance entre orthographe et prononciation ci-dessous. Nous dirons que les voyelles orthographiques apparaissant dans les contextes décrits dans ce tableau, et se prononçant comme indiqué dans ce tableau, suivent la règle orthographique.

Ce tableau est fondamental.

Quelle(s) voyelle(s) ce tableau ne présente-t-il pas ?

- /JI/
- /au/
- /uː/
- /ə/

3.1.2 Écriture des symboles

- Les lettres doivent être formées à la façon des caractères d'imprimerie, pas des caractères manuscrits.
- Attention aux symboles suivants : /ə ɔ ɪ ʊ ɜ æa ɒ ∫ ʒ θ ð g/
- Distinguez:
- /I i/
- /ə a/
- /æa a/
- /z 3/
- /3 3/
- /θ ə ɔ/

5.2 /æ/ in American

We follow Labov (2010).

Images are from wikipedia

5.2.1 An example of sound changes: the NCS

The Northern Cities Shift is a rotation of short vowels taking place in the Inland North, a territory comprising 34 million speakers.

Figure 1 – Map of the Inland North

Assumed order of the rotation:

- 1. General raising and fronting of /æ/ ("bat")
- 2. Fronting of /p/ ("got")
- 3. Lowering of /ɔː/ ("bought")
- 4. Backward shift of /e/ ("bet") towards /\(\lambda \)
- 5. Backing and rounding of /A/
- 6. Backing of /ɪ/ ("bit")

This rotation of short vowels is a remarkable development, given the relative stability of the English short vowel system from old English up to the twentieth century (p.112).

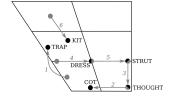

Figure 2 – The Northern Cities Shift

No other dialect shows such a generalized tensing and raising (p.113).

5.2.2 Let's focus on /æ/

While *a* is raised and fronted in particular context by almost all speakers of North American English, a historical process in this particular area has eliminated all **contextual conditions** (p.114).

All other dialects with short-a raising will differentiate prenasal vowels from others (p.113).

4 types of short-*a* systems originating from upstate New-York:

12

- 1. The nasal system: allophonic tensing of /æ/ before nasal consonants, and nowhere else (New England)
- 2. The nasal system with the broad-a pattern: "aunt", "can't", "half", "past" (newer settlers)
- 3. *The split short-a system:* tensing in syllables closed by voiced stops, voiceless fricatives and front nasals along with many grammatical and lexical specifications (*cf.* "mad", "bad", "glad" vs. "sad" and "dad" in Philadelphia).
- 4. The Celtic substrate: speakers of Hiberno-English, where short a is low front or low entral.

This of course leads to misunderstandings...

5.2.3 NCS-induced misunderstandings

The following examples show what non-NCS speakers understood.

- Correct the examples to what was actually meant.
- Say which step of the NCS these misunderstandings were caused by (1/2/3/4/5/6).

This area is full of bets. Do you have any pots in the house? We trucked across Wisconsin. Senior citizens living on the black. The Express Way is jammed salad.

5.2.4 Other misunderstandings

Can you formulate *why* the following misunderstandings happened, using phonetic concepts?

Meant	Understood

6.3 Introduction to assimilation

Assimilation is a type of coarticulation . It is the alteration of a speech sound to make it more similar to its neighbours. In English, assimilation mostly affects Place of Articulation.

It is a result of **phonetic conditioning**. Phonetic conditioning is a term used to cover the way in which speech segments are influenced by adjacent segments, causing phonemes to vary in their realisation according to phonetic context. Assimilation is one of three main types of conditioning, along with allophonic variation and elision.

6.3.1 Historical assimilation

Listen to the following words and transcribe them:

Words
import
nature
soldier
delicious
patient
nation
pressure
measure

These words feature instances where /j/ was **coalesced** to /ʃ/ a few centuries ago. In terms of place of articulation, /ʃ/ as a post-alveolar fricative is half-way between alveolar fricative /s/ and palatal approximant /j/. Both segments saw their place of articulation shift under their reciprocal influence.

In historical assimilation, the **citation form** features the assimilated sounds (e.g. $/\text{sj}/ \rightarrow /\text{f}/$). This is **not** the case in connected speech:

6.3.2 In connected speech

6.3.2.1 Citation forms

/hed 'kwɔ:t.əz/ /mem kɔ:s/ /mætʃt peəz/ /pə.'hæps/ /'brɔ:d.kɑ:st/
/mætʃt peəz/ /pə.ˈhæps/
/pə.ˈhæps/
/broid.kaist/
/wart 'pep.ə/
/on ði: haʊs/
/reiz jo: gla:s/

6.3.2.2 Assimilation in connected speech In connected speech, syllable-final alveolars tend to assimilate and adopt the place of articulation of the succeeding phoneme:

- "head quarters" → / heg 'kwɔːtəz/
- "main course" → /mein 'kɔis/
- "broadcast" \rightarrow /'broigkaist/

8.3 Back to assimilation

8.3.1 Directions of assimilation

Consider:

- "ten men"
- · "happens"
- "raise your glass"

Can you categorize those assimilations?

- Regressive/lagging assimilation
- Progressive/leading assimilation
- · Reciprocal assimilation

8.4 Types d'influence

Trouvez les endroits où peuvent se produire des assimilations, et tentez de les classer :

wet blanket statement night cap weed killer horseshoe newspaper have to join the army fail the test

8.4.1 The three types

- 1. place assimilations
- 2. energy assimilations
- 3. manner assimilations

8.4.2 Place assimilations

Cf. most previous examples.

By far the most common type of assimilation in English.

8.4.3 Manner assimilations

In English, it is usually a form containing a fricative which is replaced by a nasal or a lateral.

Another example: "till they meet again".

8.4.4 Energy assimilations

These involve a reduction of the fortis/lenis contrast (voiced/voiceless).

In English, EA:

- only goes from lenis to fortis, never the other way round ("back door" or "not bad")
- is rare in stressed syllables, cf:
- "have to", "used to", where EA has now become compulsory.

8.5 Homework

Identify the connected speech assimilations likely to occur in the following sequences:

it was spectacular of course if she chooses to wait the waiter's forgotten us

9 Lesson n°8

9.1 Energy assimilations

- ... In English, EA:
- is frequent in unstressed contexts: "it was spectacular", "of course", "if she chooses to wait", "the waiter's forgotten us"...

9.1.1 Correction of the homework

Word	Stress	Received Pronunciation
it was spectacular	//	/ɪt wɒz spek.ˈtæk.jʊl.ə/
of course	//	/s:cx va/
if she chooses to wait	//	/ɪf ʃiː ˈtʃuːz.ɪz tuː weɪt/
the waiter's forgotten us	//	/ði: NA fə.ˈgɒt.ən лs/
Helen could have talked to him	//	/ˈhel.ən kʊd hæv NA tu: hɪm/
as she sometimes did	//	/æz ∫iː ˈsʌm.taɪmz dɪd/

- only goes from lenis to fortis, never the other way round ("back door" or "not bad")
- is rare in stressed syllables, cf:
- "have to", "used to", where EA has now become compulsory.
- word-internal EAs with free variations: "absurd", "obsession", "absorb"...

Word	Stress	Received Pronunciation
absorb	/01/	/dica'.de/
obsession	/010/	/əb.ˈse∫.ən/
absurd	/01/	/bs.'s3:d/

Energy assimilation is also the process which explains the pronunciation of certain infamous morphosyntactic suffixes...

9.1.1.1 Morphosyntactic suffixes

9.1.1.1.1 <-(e)d> Explain the pronunciations of:

• "tagged", "tacked", "buzzed", "cursed", "played", "chafed", "loved".

Word	Stress	Received Pronunciation
tagged	/1/	/tægd/
tacked	/1/	/tækt/
buzzed	/1/	/bʌzd/
cursed	/1/	/k3:st/

played	/2/	/ˌpleɪd/	
chafed	/1/	/t∫eɪft/	
loved	/1/	/lʌvd/	

Can the suffix be pronounced differently? How and where?

9.1.1.1.2 <-(e)s> Explain the pronunciations of:

• "shoves", "freckles", "books", "shrimps", "bags", "stubs", "whiffs"

Word	Stress	Received Pronunciation
shoves	/1/	/ʃʌvz/
freckles	/10/	/ˈfrek.əlz/
books	/1/	/bʊks/
shrimps	/1/	/∫rɪmps/
bags	/1/	/bægz/
stubs whiffs	/1/ /1/	/stʌbz/ /wɪfs/

Can the suffix be pronounced differently? How and where?

9.1.2 Elision

Sometimes in connected speech, phonemes are elided, *i.e.* deleted, to make articulation easier.

Examples: "tasteless", "mind-bogling"

Historically, elision is a very common phenomenon:

• "cupboard", "talk", "comb", "gnome", "whistle"...

Word	Stress	Received Pronunciation
cupboard	/10/	/ˈkʌb.əd/
talk	/1/	/tɔːk/
comb	/1/	/kəʊm/
gnome	/1/	/nəʊm/
whistle	/10/	/ˈwɪs.əl/

9.1.3 Liaison

The converse of elision is liaison.

Regardless of the rhoticity of a given accent of English, a **linking /r/** is often added as a link across word boundaries (also called *sandhi r*).

- "sooner" vs. "sooner or later"
- "sure" vs. "sure enough"
- "the sofa in the catalogue"
- "my idea of heaven"
- "we saw a film"

• "via Australia"

Word	Stress	Received Pronunciation
sure enough	//	/ʃɔː ɪ.ˈnʌf/
the sofa in the catalogue	//	/ðiː ˈsəʊf.ə m ðiː ˈkæt.ə.lɒg/
my idea of heaven	//	/mar ar.ˈdɪə ɒv ˈhev.ən/
we saw a film	//	/wiː sɔː eɪ fɪlm/
via Australia	//	/ˈvaɪ.ə ɒ.ˈstreɪl.i.ə/

(All this chapter was inspired by Collins and Mees (2013))

10.2 Introduction to secondary stress

10.2.1 Observe

What rules regarding secondary stress can be infered from the following examples?

Word	Stress	Received Pronunciation
character	/100/	/ˈkær.əkt.ə/
characteristic	/20010/	/ˌkær.əkt.ə.ˈrɪst.ɪk/

imagine	/010/	/ɪ.'mædʒ.ɪn/
imagination	/02010/	/ɪ.ˌmædʒ.ɪ.'neɪʃ.ən/

10.2.2 A few principles

If:

- 1 syllable precedes the primary stress, it is unstressed.
- 2 syllables precede the primary stress, the pattern must be /201-/.
- 3 syllables precede the primary stress, the pattern can either be /0201-/ or /2001-/ depending on the original stress pattern of the deriving word.

10.3 Règles fondamentales

- Un mot anglais a toujours un accent primaire unique.
- La séquence /00-/ en début de mot est impossible.
- Deux syllabes accentuées ne peuvent pas se succéder.
- /ə/ ne se trouve que dans les syllabes inaccentuées.
- Les schémas accentuels se lisent par la droite.

10.4 Quelques suffixes contraignants

On appellera "suffixe contraignant", ou "suffixe fort", une terminaison déterminant prioritairement l'emplacement de l'accent primaire.

10.4.1 Une règle célèbre
